

TRAINING AND INFORMATION MEDIA ON ISO 9001:2015

DRSM TRAINING AND INFORMATION MEDIA SUPPORT A LASTING TRANSFER OF KNOWLEDGE

Your benefit:

Brochures are used by **auditors** and others in an audit to inform employees about the requirements of the respective standard in an easily comprehensible manner, to familiarize **management and other executives** in a short period of time with the requirements of the standard and give them ideas for implementation / implementation support, and to instruct **consultants** and others durably in their consulting competencies.

Training packages of norm structure training have been designed in a way that they serve as sustainable reference material for the participants after the courses.

Posters are used to support organization-wide information and awareness building regarding integrated management systems.

The **single workplace media package** is used as a sustainable training document for consultants, auditors, and other executives for effective teaching of the requirements of a standard. The PowerPoint presentation provided can be adjusted and altered in accordance with our terms and conditions.

The **intranet version of the media package** allows the use of cartoons and media throughout the organization. This relates to both familiarization with the intranet of an organization and to the rights of use of the cartoons by consultants, auditors, and other trainers in their own documents with reference to the source.
